

**2010 Goal...become a Certified Medical Coder! Here's why.....**  
Physicians welcome!

Physicians today need an educated administrative team, capable of contributing to the financial health of the practice. The billing/coding aspect of the medical practice is a very important piece that is often neglected as an expense rather than the investment it truly is.

Guard your practice against fraud and abuse. Be sure that codes are submitted to the highest degree of specificity to ensure that you receive every dollar entitled for the services rendered.

**Certified Medical Coder Course**
